

10

FIG. 1 is a block diagram of a system 10 for processing payments. The system 10 includes a payment receiving platform 46, a payment server 72, and an internet backbone 66. The payment receiving platform 46 is connected to the payment server 72 via the internet backbone 66. The payment server 72 includes a payment account deposition 74. The payment receiving platform 46 includes operating circuitry 12, a storage element 34, a connector 22, a connector download controller 32, and an electronic wallet 54. The connector download controller 32 is connected to the connector 22 and the electronic wallet 54. The connector 22 is connected to the operating circuitry 12. The payment server 72 is connected to the internet backbone 66. The internet backbone 66 is connected to the payment receiving platform 46.
